*Occupational Information; *Resource Guides; Science

Curriculum: Secondary Education

IDENTIFIERS Louisiana

ABS'TRACT

The resource quide integrates learning activities in biological science with an exploration of careers in biology or related fields. The materials are divided into seven units: tools of the scientist, basis for life, diversity (protists, plants, animals), structure and function, continuity (reproduction, development, and genetics), evolution, and ecological concepts. Each unit is discussed by subdividing the information or ideas into categories of: (1) content outline, (2) suggested curriculum activities, and (3) career information (occupational clusters, career activities and careers related to biology). Career activities may or may not relate to the specific subject matter with which it appears. The content outline suggests a possible sequence for covering materials while the activity column suggest exercises, that could effectively be used with each unit or sub unit. A list of State adopted biology textbooks (categorized by learning level) and a career bibliography for grades 10-12 conclude the document. (Author/NJ)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal

reproducibility are often encountered and this affects the quality
 of the microfiche and hardcopy reproductions ERIC makes available

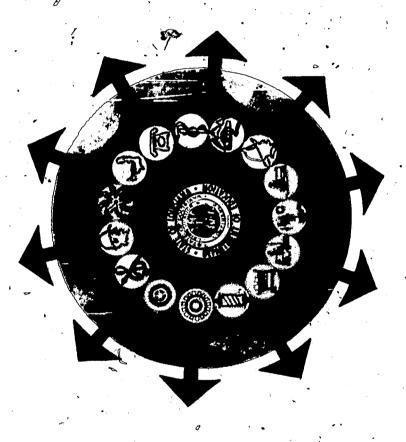

* via the ERIC Document Reproduction Service (EDRS). EDRS is not

responsible for the quality of the original document. Reproductions

* supplied by EDRS are the best that can be made from the original.

ACKNOWLEDGMENT

With increased concentration in the area of Public attention is being focused on career education as a means of strengthening our To ining individualized instruction, teachers were selected to produce a working draft for sure the development of a practical and continuously progressive program, and stressvocational education, recognition of the need for guidelines became apparent. the dedicated science teachers of Louisiana to expandand improve upon. present academic curriculum in Louisiana,

Individual and group evaluations will be collected and data tabulated so that excellence Acknowledgments then must first be given to the classroom teacher, the key person to an educational endeavor. can be assured in the completed guide.

Much credit is due all those individuals and agencies who pioneered in the development of the Career Education Resource Guides in Science.

als, related, practical and easy to perform activities, and a listing of occupational clusters assistance to teachers in planning lessons, selecting activities, and in relating materials Its only purpose is to offer suggestions and stimulate design of this, publication is to offer suggestions to instructors as to sequence of materi-The basic as they apply to the specific areas. By no means is this production meant to dictate what Since there are different biology texts, programs, and other materials used in the school systems of Louisiana, this guide was written with the anticipation that it will provide to the varied occupational clusters to meet the objectives of Career Education. students are to study.

vide a generalized indication of what careers correspond with the various categories of study. suggests a possible sequence for covering materials while the activity column gives suggested the guide and prevent repetition, the occupational clusters are related to each unit and proof Content Outline, Suggested Curriculum Activities, Occupational Clusters, Carsen The materials used in this guide are divided into seven major units: Tools of the Scientist So as to condense Career activities and information may or may fach division or unit is discussed by subdividing the information or ideas into not relate to the specific subject matter by which it appears. The content outline simply Basis for Life, Diversity, Structure and Function, Continuity, Evolution, and Ecological exercises that could effectively, be used with each unit and/or sub-unit. It is intended that teachers will take this material and Activities and/or Careers Related to Biology.

The number at the end of the suggested activities refers to the reference where this activity may be found.

Constructive suggestions are welcome to improve this working draft

CAREER CONCEPTS AND OBJECTIVES: . A SEQUENTIAL PLAN

Recognition of the Adult World of Work-Early Agareness of Careers is the Prelude to Future Achievement The individual is the born resource of society Individuals have many kinds of careers CAREER AWARENESS:

(K-3)

CAREER MOTIVATION: Increasing interest in future world of work in relation to the individual and to society

Meaningful, rewarding careers are available to

every individual

(2-6)

Work is basic to human development

. Occupations contribute to society's progress

. Careers require different knowledge, abilities, attitudes, and talents

Individuals have different abilities, interests, needs, and values

. Individuals seek careers for varied reasons

Continue:

3. Meaningful, rewarding careers are available to every individual

III. CAREER EXPLORATION: Relating self to needs

(0-N

9. Environmental variability creates variable opportunity

10. Careers can be grouped into clusters

11. Different careers are interrelated

12. Every career requires some special preparation and naplan of special preparation facilitates this

Continue:

7. Individuals have different abilities, interests, needs and values

8. Individuals seek careers for varied reasons

IV. TENTATIVE CAREER DECISIONS AND EXPLORATION: Focusing career options on a few realistic possibilities

13. Individual careers may change as individuals change throughout life

4. Individuals may be suited for several different careers

5. Individuals adapt to world changes and environment

16. World changes, conditions, and environment affect

Continue:

7. Individuals have different abilities, interests needs, and values

8. Individuals seek careers for varied reasons

10. Gareers can be grouped into clusters

11. Different careers are interrelated

12. Every career requires some special preparation and a plan of special preparation facilitates this

V. ACQUISITION OF CAREER ENTRY SKILLS AND CONTINUED EXPLORATION:
Acquiring skills, habits, and attitudes leading to competence

17. Careers require different levels of competence in communication, computation, and analysis

18. Careers have different levels of competence and responsibility

19. Rules, regulations, policies, and procedures affect individuals in all careers

20. Careers are affected by the ability of individuals to relate to each other

Continue:

3. Individual careers may change as individuals change throughout life

14. Individuals may be suited for several different careers

5. Individuals adapt to world changes and environment

CAREER GUIDE FORMAT

Physical Working Environment

Where is the work done?

work alone or with a group? s the work hazardous?

#111 I be expected to attend social functions?

What mode of dress or appearance is required for the job? s the work seasonal? low many people are employed in this occupation? (As of now and through the '70s)

s the number of people employed different than it was ten or twenty years ago?

dow many hours per week will I work?

Steps of Promotion Title of the occupation

Educational requirements for promotion

Personal qualifications needed Práctical experience needed

Juties of the job to which promoted

what way will I enter this work?

Is previous experience needed?

Apprenticeship%

Internship?

Others?

Educational Requirements for Promotion

What is the approximate cost of preparing for entry into this occupation?

What is the approximate cost of any additional education or training which I might need?

Salary Range

wenues from which funds for additional education may be secured

Student stipends Student loans

Scholarships

Company stipends

CAREER CLUSTERS

A. The Agri-Business and Natural Resources cluster includes:

Operations
Support and regulations
Research
Forestry
Land and water management
Fisheries and wildlife
Mining and quarrying
Petroleum and related products
Service
Production
Processing and marketing

B. The cluster for communication and media includes:

Operations
Line communications
Broadcasting
Audio-Visual Elanguage
Publishing

3. The construction cluster includes:

Operations
Design
Contracting
Interior
Landscaping
Land development
Fabrication and installation

The Consumer and Homemaking (related occupations) cluster includes

Operations Food service industry

Clothing, apparel and textile industry -Child care, guidance and teaching Family and community services Institutional household maintenance services Interchangeable technician for homemaking Housing design and interior decoration

E. Included in the cluster for Environment are:

Operations
Soil and mineral conservation and control
Space and atmospheric monitoring and control
Environmental health services
Development and control of physical man-made environment
Forest, range, shore and wildlife conservation and control
Water resource development, conservation and control

. The cluster for Fine Arts and Humanities includes:

Operations Fine Arts Humanities 3. The Health Occupations cluster includes:

Operations
Health information systems
Health services delivery
Mental health, mental illness and retardation
Accidents, injuries and emergency services
Dental Science and services
Pharmaceutical science and services

H. The Manufacturing cluster includes:

Operations
Design
Materials
Production
Distribution
Research

I. Included in the cluster of Marine Sciences Occupations are:

Operations
Marine Biology
Commercial fishing
Aquaculture
Marine (oceanographic) exploration
Underwater construction and salvage

f. The Marketing and Distribution Occupations cluster includes:

Operations
Marketing system
Sales and services
Buying
Sales Promotion
Physical distribution
Marketing services

K. The cluster for Personal Services Occupations includes:

Operations
Physical culture
Cosmetology
Mortuary science
Barbering
Household pet services

Within the Public Service cluster are:

Operations
Financial
Urban development
Regulatory services
Education
Police and fire
Defense
Post Office
Public utilities
Public health
Labor affairs
Highways
Public transportation

Social and rehabilitation Courts and corrections Parks and recreation The cluster for Recreation, Hospitality and Tourism includes: E

Operations
Environmental management
Community services
Human development
Mobility
Health care

N. The cluster for Business and Office Occupations includes:

U

Operations
Record Systems and Control
Secretarial
Clerical
Administrative
Business Ownership

. The final cluster to be considered, Transportation, includes:

Operations
Aerospace transportation
Pipeline transmission
Water transportation
Land transportation

h

Chemical Basis 1. Identify some substances found in protoplasm.(11) 2. Demonstrate electrolysis of water. (1) 1. Demonstrate selected activities of the cell membrane.(1) 2. Demonstrate selected activities of the cell membrane.(1) 3. Demonstrate selected activities of the cell membrane.(1) 4. - 17. Acquaint the student with the fundamentals of embryonic development in the frog. (11)
- 18. Study the life history of daphnia. (21)
- Establish a culture of mealworms and study the stages. (21)
- 20. Observe inheritable characteristics on students. (2)
- 21. Teach the techniques for handling fruit flies. (2)
- 22. Make a monohybrid cross using fruit files to verify the laws of heredity. (6)

CAREER INFORMATION

WASTEWATER TREATMENT PLANT OPERATOR

Wastewater treatment plant operators control equipment and facilities to remove waste materials or render them harmless to human, animal, and fish life.

Approximately 30,000 operators were working in 1970. About one-half of these were in the following eight states: California, Illinois, New York, Ohio, Texas, Pennsylvania, Florida, and New Jersey.

Entry jobs generally do not require specific training, and most operators learn their skills on the job.

Employment of operators is expected to rise rapidly through the 1970's mainly as a result of the construction of new treatment plants to process the increasing amount of domestic and industrial wastewater.
